

557 反转字符串中的单词III

Label: 字符串

给定一个字符串，你需要反转字符串中每个单词的字符顺序，同时仍保留空格和单词的初始顺序

输入: "Let's take LeetCode contest"

输出: "s'teL ekat edoCteeL tsetnoc"

- StringBuffer API

```
class Solution {
    public String reverseWords(String s) {
        String[] wordArray = s.split(" ");
        StringBuffer stringBuffer = new StringBuffer();
        for (String word : wordArray) {
            stringBuffer.append(new StringBuffer(word).reverse());
            stringBuffer.append(" ");
        }
        return stringBuffer.toString().trim();
    }
}
```
